 - ☞ audits and assessments
- ◆ **Safeguards, Security, and Nonproliferation – examples:**
 - ☞ MC&A
 - ☞ nonproliferation and threat reduction planning

Mentor and Technical Representative Have Been Extremely Helpful – During Our Journey

- ◆ We had just learned that we would become a BWXT Y-12 Protégé when our proposed Mentor accepted a new position
- ◆ We had not met the manager who replaced him
- ◆ But our technical representative took the steps necessary to bring us on board with our new Mentor – however, the new Mentor retired very soon
- ◆ So once again, we would have a new Mentor
- ◆ But “all is well that ends well” – we now have a super Mentor to go with our super Technical Representative
 - 👍 Susan Howell, Mentor
 - 👍 Teresa Knight, Technical Representative

The Mentor Protégé Program Greatly Enhances Our Ability to Reach Our Goals

- ◆ Key milestones for our company are to grow the company, develop our people, and work closely with our customers to assure win-win results
- ◆ The Mentor Protégé Program helps to achieve those milestones
 - 👍 When considering opportunities, we seek the advice of our Mentor
 - 👍 We diversify and train our people
 - 👍 The diversification provides additional knowledge and experience that we then offer to our customers

The Benefits of the Program are Maximized Without an Excessive Drain on Managers' Time

- ◆ We adhere to a structured plan in the interactions with our Mentor Protégé – quarterly meetings with phone calls, if necessary, in between
- ◆ We prepare a carefully thought-out agenda to discuss the status of our activities, present future plans, and ask for advice for activities ongoing across the DOE Complex
- ◆ We look for ways to assist BWXT Y-12 – we understand the Mentor Protégé Program must be beneficial to both the Mentor and the Protégé

Summary

The Mentor Protégé has been a wonderful experience for our company, for our employees, and for me personally
