U.S. Department of Energy Categorical Exclusion Determination Form

Proposed Action Title: NEPA 4951, Demolition of Buildings 9727-04, 9727-04A, 9409-34, and Nitrogen Tower

Program or Field Office: Location(s) (City/County/State): Y-12 National Security Complex, Oak Ridge, Tennessee

Proposed Action Description:

The Y-12 National Security Complex's proposed action is to demolish and disposition Buildings: 9727-04 (1,752-ft² former Compressed Air Plant), 9727-04A (977-ft² addition to Building 9727-04), 9409-34 (Cooling tower built in 1983), and the associated nitrogen tower outside 9727-04. Building 9727-04 is a light steel frame building with metal siding and was completed in 1963. Building 9727-04A is a wood frame building with metal siding constructed in 1996. All processes were shut down in 2013 after a replacement facility was constructed. The nitrogen tower, along with the cooling tower, and these two buildings would be demolished to existing slabs with all utility slab penetrations plugged and capped. A walk-down and internal survey of the building structures would assess the presence of migratory birds and roosting bats. If present, mitigation actions would be required. The primary mission or objective is to reduce the overall risk associated with this unoccupied and deteriorating non-process-related facility, eliminate associated management and operation costs, and reduce the plant footprint.

Categorical Exclusion(s) Applied:

B3.23 - Demolition and disposal of buildings

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b):

/	The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. See paragraph above for specific categorical exclusion(s) applied.						
The classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B include conditions that are integral elements of the cla actions which must be satisfied in order to determine that a proposal is categorically excluded under Appendix B. Specifically, a proposal must be one that would not:							
	V	(1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;					
	☑	(2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities:					

- (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
- (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to:
 - (i) Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, Federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places:
 - (ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or Federally-proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise Federally-protected species (such as the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act);
 - (iii) Floodplains and wetlands (as defined in 10 CFR 1022.4, "Compliance with Floodplain and Wetland Environmental Review Requirements: Definitions," or its successor);
 - (iv) Areas having a special designation such as Federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, state and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and marine sanctuaries;

		7		nland, or other farmland of state otection Policy Act: Definitions		s defined at 7 CFR		
		V	(vi) Special sources of v sources that are vital in a reg	water (such as sole-source aqui gion); and	fers, wellhead protection are	eas, and other water		
		✓	(vii) Tundra, coral reefs.	, or rain forests;				
	Ø	5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.						
✓	There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternative uses of available resources.							
V	The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or §1021.211 of this part concerning limitations on actions during EIS preparation.
