My signature on the corresponding CFN-1251, UPF Construction Attendance Sheet, indicates that I have read the JHA and have received answers to any questions I had relative to the JHA. My signature further indicates my willingness to comply with the provisions and requirements of the JHA.

JHA NO.:		JHA-00720	REV:	6	ISSUE DATE:	9-24-25
JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
General Site Activities	Work Over or Near Water	Drowning	All personnel must participate in an FLHA (pre-task briefing) that includes the process for working over, or in the vicinity of, water. Equipment and vessels must be confirmed as fit for purpose, properly maintained, and safe to use. Personnel must wear an appropriate and approved life jacket, buoyancy aid, or personal flotation device for their assigned work location and tasks.			
			· Wear a personal flotation device			
			· Always work with a buddy			
			· Ensure site communications (e.g., cell phone or site radio) prior to approaching water			
			· Maintain situational awareness know where you are in regards to the water line			
			· Maintain good housekeeping maintain tools, materials, and supplies in an organized manner to reduce potential for slips, trips, and falls			
			· Walk and work as far from the waterline as possible			
General Site Activities	Remote or Lone-Worker	Working Alone	Prior to accessing remote areas, ensure the Supervisor is notified for accountability and a reliable communication method is maintained (e.g., phone). When accessing a specific work area/activity additional briefing may be required (e.g., FLHA card briefing).			
			NOTE: For lone worker activities- Ensure Supervisor or designated co-worker is informed when leaving and expected return. Check in with Supervisor or designated co-worker when return to office.			
General Site Activities	Stop or Pause Work Authority	Delayed and Inadequate Response	All Project personnel have the right to refuse to perform tasks that they believe are unsafe. Along with this right (or authority) comes the responsibility to take an active role in resolving ES&H issues. All Project personnel have the duty to investigate the ES&H aspects of the jobs they perform and to require that satisfactory controls be in place before beginning work.			
			Each Project employee is responsible for adhering to safe work procedures when performing work. Each worker is guaranteed the right to refuse or stop work that he or she perceives to be unsafe. Exercise of this authority must not result in any form of reprisal or negative personnel action by management.			

UPF JOB HAZARD ANALYSIS

JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
			<p>While each Project employee has the authority and responsibility to stop work when imminent danger is perceived, only select Project personnel have the authority to stop operations when the perceived danger is less imminent or certain. Every employee, however, has the right and responsibility to raise any issues relating to worker safety and health. Report your safety concern to any of the personnel listed here:</p> <ul style="list-style-type: none"> · The ES&H manager or representative · Your supervisor · Field engineers or inspectors · Subcontractor supervisors or task managers · Government officials with oversight responsibility for worker safety and health 			
General Site Activities	Inclement Weather	Delayed and Inadequate Response	<p>Inclement weather conditions can have an adverse effect on some outdoor activities. Consider the weather before starting outdoor tasks. Be aware that changes in the weather can occur suddenly. Use good judgment regarding what action to take. Consult with your supervisor and follow OC announcements.</p> <p>Refer to UPF-POLICY-CM-002, UPF Weather Policy for additional information</p> <p>Winter Weather</p> <p>Call (865) 241-1212 or sign up to receive Y-Alert notifications to obtain information about a weather-related closure or delay at Y-12. Additional sources of information include the Y-12 external website and local radio and television stations.</p> <p>Notify your supervisor or manager of any road conditions (or other circumstances) that affect your ability to report to work.</p> <p>Within the Y-12 site, stay on designated routes (e.g., roadways cleared by snow removal equipment to facilitate vehicle travel), and park in designated areas.</p>			

UPF JOB HAZARD ANALYSIS

My signature on the corresponding CFN-1251, UPF Construction Attendance Sheet, indicates that I have read the JHA and have received answers to any questions I had relative to the JHA. My signature further indicates my willingness to comply with the provisions and requirements of the JHA.

JHA NO.:		JHA-00720	REV:	6	ISSUE DATE:	9-24-25
JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
			Avoid any unnecessary travel, whether by vehicle or foot. If you cannot avoid walking on slippery or icy surfaces, wear appropriate footwear, take short steps, keep hands out of pockets, and use handrails where available. Stay on walkways designated as snow routes and use only designated building entrances and exits.			
			Treat walkways and steps with ice chaser/melt flag or barricade the areas as needed to prevent access.			
			Other Inclement Weather			
			Severe weather conditions (i.e., thunderstorms, lightning, high-wind conditions, tornado watches and warnings) approaching the Oak Ridge area are monitored by OC and site management. Personnel will be notified of impending severe weather conditions and the appropriate action to take.			
			If you observe lightning, even if you have received no announcement or notification, stop your outdoor activity, take shelter, and contact your supervisor for further direction.			
			All of the buildings under construction are grounded and are safe shelters.			
			Movement from building to building (e.g., safe shelter to safe shelter) is allowed during conditions when lightning is within 15 miles of the Y-12 site. Personnel may also travel to and from bus pick-up locations.			
General Site Activities	Evacuations	Delayed and Inadequate Response	Be able to recognize the sound of the evacuation alarm, and know the proper evacuation route from your work area to the assembly station. When you hear the evacuation siren, evacuate to the assigned or nearest assembly station. Each assembly station is marked with a letter (alphabetic character) on a round, orange-colored sign mounted on a post.			
			When you hear the evacuation siren, take the following actions:			
			· Stop what you are doing

JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
			<ul style="list-style-type: none"> · If time permits, place tools and equipment in a safe configuration · Leave the area and proceed to the assembly area in a quick and orderly manner · Report to the Assembly Station Director · Remain at the assembly station until released by emergency services personnel 			
			Depending on the emergency, different protective actions may be called for, which include the following:			
			<ul style="list-style-type: none"> · Take cover – Seek shelter in a structurally sound area of the building and monitor the public address system · Shelter-in-place – Remain or go indoors and monitor the public address system or radio. When the shelter-in-place is given for hazardous materials, turn off outside sources of air, close and seal doors and windows. · Curfew – Follow instructions of emergency services personnel when a curfew is imposed. Curfew is used at Y-12 in an emergency situation when there is a need to control movement of personnel throughout the site. 			
General Site Activities	Emergencies	Delayed and Inadequate Response	Report emergencies at the Y-12 National Security Complex (Y-12) to Y-12 emergency services personnel. Use any of the following methods to reach Y-12 emergency services, regardless of whether you are reporting a fire, injury, illness, or other emergency: <ul style="list-style-type: none"> · Y-12 telephone: Call or send someone to call 911. After placing the call to 911, notify your supervisor and ES&H department. · Cell phone: Call (865) 574-7172 to reach Y-12 Operations Center (OC). <p>NOTE: Calling 911 from a cell phone will not reach Y-12 emergency responders.</p> <ul style="list-style-type: none"> · Fire alarm box: Activate the nearest fire alarm box (follow the instructions on the box). The emergency need not be a fire a response team will come. 			

UPF JOB HAZARD ANALYSIS

My signature on the corresponding CFN-1251, UPF Construction Attendance Sheet, indicates that I have read the JHA and have received answers to any questions I had relative to the JHA. My signature further indicates my willingness to comply with the provisions and requirements of the JHA.

JHA NO.:		JHA-00720	REV:	6	ISSUE DATE:	9-24-25
JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:		N/A	SPECIFIC LOCATION: N/A
Activity	Sub-Activity	Hazard	Control			
			· Y-12 radio system: Break in and say “EMERGENCY, EMERGENCY, CLEAR THE CHANNEL.” Repeat if necessary. Ask another person on the radio to call 911. Go to the OC channel (Zone 2 or 34 OC).			
			· UPF Medical: (865) 576-8627 NOTE: <i>Personnel assigned to off-site Project offices or locations should know and follow established emergency guidelines.</i>			
General Site Activities	Incident Reporting	Delayed and Inadequate Response	· Report all work-related incidents, injuries, and illnesses to your supervisor and ES&H representative immediately no matter how minor they may seem. Medical treatment will be provided by the UPF designated medical facility, as needed, and the incident will be documented. If follow-up treatment is required, there will be a record of your injury or illness. Serious injuries will be coordinated through the Y-12 OC office (#574-7172) and medical treatment may be provided at an off-sight medical facility (hospital) as determined by Y-12 Emergency Medical Technicians and/or the UPF medical staff. The UPF medical trailer is located to the east of the Construction Support Building (CSB) # 9127 and the Y-12 site medical facility is located in the Jack Case Office Building.			
			· If you believe you had a work-related injury or illness and did not report it before leaving the worksite, contact your supervisor and OC as soon as possible, but do so within eight (8) hours of first indication of injury/illness. If you obtained medical treatment from an off-site provider (e.g., family doctor, emergency room) for an unreported work-related injury or illness, notify your supervisor and OC as soon as possible, but no later than the start of your next scheduled work shift. Any documentation of treatment and work restrictions prescribed by the treating physician must also be provided to your supervisor or Medical (as appropriate).			
			· Before returning to work after a non-work-related injury or illness which required medical attention or generated restrictions that may hinder your work performance, obtain a medical clearance (return-to-work slip) from your physician, and present it to your supervisor and Project Medical.			
General Site Activities		Distraction Slip/Trip/Fall	DO NOT use headphones, speakers, CD players, or other such equipment while in active construction work areas.			

UPF JOB HAZARD ANALYSIS

My signature on the corresponding CFN-1251, UPF Construction Attendance Sheet, indicates that I have read the JHA and have received answers to any questions I had relative to the JHA. My signature further indicates my willingness to comply with the provisions and requirements of the JHA.

JHA NO.:		JHA-00720	REV:	6	ISSUE DATE:	9-24-25
JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
	Radio and Electronic Equipment		Workers shall not use cell phones while engaging in work tasks or operations that may be considered critical or hazardous. The use of cell phones is also not permitted when it could cause distraction and increase the potential for mishaps.			
General Site Activities	Signs and Tags	Improper Hazard Communication	Appropriate signs and tags will be placed at hazardous and potentially hazardous locations throughout the UPF construction site. All accident prevention signs and tags shall conform to applicable regulatory specifications (i.e., use, color, size, placement, and wording).			
General Site Activities	Electrical Safety	Electric Shock	Follow requirements found in UPF-MANUAL-CM-001, <i>Uranium Processing Facility Construction Electrical Safety Manual</i> .			
General Site Activities	General Area Lighting	Inadequate Lighting	· Establish lighting based on schedule, volume of use, and security concerns for parking lots and non-production areas			
			· Protect lightbulbs from breakage in accordance with the manufacturer's guidance or as required by regulating agencies			
			· Position light fixtures in such a manner that will prevent employees from coming into contact with the fixtures during work operations			
			· Clearly illuminate ladder access and egress			
			· Ensure metal-case sockets are grounded			
			· When work is in progress, then minimum illumination intensities in construction areas shall be as shown in Table 1 of UPF-CP-200. General construction area lighting is 5 foot-candles. Contact your supervisor and ES&H to evaluate lighting of specific areas.			
General Site Activities	Electrical Extension Cords	Electrical Shock	· Follow the requirements of UPF-MANUAL-CM-001			
			· An item found with defects shall be tagged "Danger. Defective Tool/Equipment. Do Not Use" and returned to a controlled area			
			· Tagged items that are returned shall be checked by an authorized worker to be repaired, returned to the manufacturer, or destroyed as determined by Construction Supervision			
			· No taping of extension cords shall be permitted as repair.

JHA NO.:		JHA-00720	REV:	6	ISSUE DATE:	9-24-25
JHA TITLE:		General Site Activities	WORK PACKAGE NUMBER/TEST INSTRUCTIONS:	N/A	SPECIFIC LOCATION:	N/A
Activity	Sub-Activity	Hazard	Control			
			Acceptable Methods for Flatbed Trailer Loading/Unloading: 1. A barricaded exclusion zone that encompasses the entire length of the truck/trailer and extends a minimum of 15 feet outward laterally on the opposite side and rear of the trailer, OR 2. A sufficient number of spotters to adequately provide direction to the forklift operator and control the loading / unloading area to exclude entry by any personnel into the personnel free zone. The spotter(s) should never stand anywhere on the opposite (hospital) side of the trailer or at the rear of the trailer where a load could fall while a forklift is engaging the load. If the 15-foot clearance cannot be maintained, stop the loading / unloading activity and contact a superintendent. For unloading operations, once the load is unstrapped, the truck driver shall remain in the truck cab or leave the area until the trailer is completely unloaded. Conversely, for loading operations, the truck driver should leave the area or remain in the truck cab until the load is ready to be strapped. The spotter has control of the loading and unloading activity until all the material has been off-loaded or the material is ready to be strapped.			
General Site Activities	Transporting Items Using Equipment	Property Damage to Vehicles, Equipment, or Permanent Plant Equipment Serious Injury to Pedestrians and or Workers	· Operators shall be trained on the equipment being operated			
			· Documented daily equipment inspections must be completed prior to operation			
			· Properly balance and secure items before transport			
			· Operator shall maintain line-of-site in the area of travel or use a spotter for direction			
			· Spotters and/or ground personnel shall remain clear of the equipment and potential drop zones at all times			
			· Spotters will communicate with the operator using pre-determined communication methods			
			• Operator shall verify the weight of the item(s) being moved and the capacity of the equipment that is moving the item			
			· Ensure areas where materials are placed can withstand anticipated loads (e.g., platforms, scaffolding, racks)			
			· Keep loads as low to ground as possible during travel to maximize equipment and load stability
