

U.S. Department of Energy Categorical Exclusion Determination Form

<u>Proposed Action Title</u>: Y12-NEPA-006-WM, Rev 0, Waste Management, Waste Minimization, Energy Conservation, Sustainability, and Pollution Prevention Activities, CY 2022 to CY 2024.

<u>Program or Field Office</u>: NNSA Production Office - Y-12 National Security Complex (Y-12), other NNSA-owned and contractor operated facilities, and ancillary areas associated with Y-12, but does not apply to the Pantex Plant

<u>Location(s)</u> (City/County/State): Oak Ridge / Anderson and Roane Counties / Tennessee

Proposed Action Description:

National Nuclear Security Administration (NNSA)'s proposed action is to perform the routine and necessary waste management, waste minimization, energy conservation, sustainability, and pollution prevention activities to comply with established permits, regulatory requirements, and to meet NNSA's missions at the Y-12 National Security Complex (Y-12). In general, this includes, but not limited to: routine waste management, storage, and handling; routine management, handling, and storage of recycled materials; sustainable procurement; waste minimization activities of separating, segregating, sorting, and recycling useful components of Y-12 waste streams; and installation of equipment that would result in better utilization of existing materials and resources for Y-12 activities. In addition, waste disposition pathways would be determined for any other proposed actions at Y-12. The major process waste types generated at Y-12 include: Low-level Radiological Waste (LLW), Mixed LLW (MLLW), hazardous waste, and nonhazardous waste. Other waste includes sanitary and industrial waste, polychlorinated biphenyls (PCBs), asbestos, construction waste/debris, general refuse, medical wastes, universal wastes, recycled waste by-products, and waste from on-site treatment. Additional details are documented in NEPA Review Form "Y12-NEPA-0621-006, Rev 0". Y-12 does not generate or manage high-level radiological waste or TRU waste.

As required by agreements among DOE, NNSA, the Environmental Protection Agency (EPA), State of Tennessee agencies, these activities would be performed in accordance with applicable laws, regulations, permits, and stipulations and controls stated in Y12-NEPA-0621-006, Rev 0. Documentation of NEPA reviews for individual projects/programs/activities will provide greater detail, state the applied control/stipulation, and will be tiered from the appropriate Categorical Exclusion Determination.

The scope of the Umbrella Categorical Exclusion Determination (UCXD) includes the following activities to assure regulatory compliance and to support Y-12 operations and projects:

- 1. Waste sampling and characterization efforts
- 2. Pollution Prevention and Site Sustainability and Stewardship efforts to recycle, reclaim, and exchange wastes and the procurement and marketing sustainable materials. This includes handling, storage, disposal or recyclable materials on-site and at off-site vendor support facilities
- 3. On-going on-site waste cleanup actions involving Resource Conservation and Recovery Act (RCRA) and Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) actions;
- 4. Management of soil/debris piles;
- Asbestos removal, handling, and storage;
- 6. The management, handling, storage, clean-up, and disposal of the following waste types: sanitary and industrial, PCB, CERCLA, RCRA, Mixed, and Radiological waste (LLW and MLLW);
- 7. Waste minimization practices, including the use of new and efficient equipment or the use of vendor services that would result in waste minimization and reuse of process materials;
- 8. Minor operation changes at Y-12 facilities to minimize waste generation and reuse material:
- 9. Improve efficiency of utility services (e.g. lighting, HVAC, water, steam, electrical, etc.) with the installation of new equipment or components;
- 10. Management of the Destruction and Recycle (DAR) Facility;
- 11. Establishment of temporary waste storage areas; and
- 12. Prepare and stage waste for off-site shipments.

The proposed action would occur at Y-12, NNSA properties at East Tennessee Technology Park, 113-C Union Valley Rd, 103 Palladium Way, and other NNSA owned properties for calendar year (CY) 2022 thru CY 2024. **Proposed actions NOT covered under this UCXD** include, capital asset projects conducted under DOE O 413.3b, *Programs and Project Management for the Acquisition of Capital Assets*. This single categorical exclusion determination (i.e. UCXD) has considered the aggregate impacts of the proposed action, as authorized by §1021.410(f), and documented in the associated NEPA Review Form.

U.S. Department of Energy Categorical Exclusion Determination Form

The proposed action of waste management, waste minimization, energy conservation, sustainability, and pollution prevention activities would take place on the Oak Ridge Reservation (ORR) have been reviewed in accordance with the Cultural Resource Management Plan (CRMP) or applicable sections in a Programmatic Agreement and would not result in an adverse effect to historic properties included or eligible for inclusion in the National Register of Historic Places (National Register). If the proposed ORR actions would have an adverse effect on properties included or eligible for inclusion in the National Register, NNSA would consult with the State Historic Preservation Officer (SHPO) and initiate actions specified in procedures set forth in the Advisory Council's regulations in 36 CFR Part 800.

To ensure that sensitive resources are protected, existing maps and surveys/studies on threatened and endangered species, wetlands and floodplains, and historically sensitive areas would be used to locate these areas. In addition, personnel responsible for identifying these resources would be consulted and, if warranted, additional surveys and walkovers would be conducted to confirm or update available information.

Although an action might fall under the category of " Waste Management, Waste Minimization, Energy Conservation, Sustainability, and Pollution Prevention Activities" a separate NEPA review would be performed and documented should the action, or aggregate impacts of the action, have the potential to result in an unusual or significant impact to the environment.

Categorical Exclusion(s) Applied:

- **B1.31**, Installation or relocation of machinery and equipment
- **B1.35,** Drop-off, collection, and transfer facilities for recyclable materials
- **B5.1,** Actions to conserve energy or water, "....weatherization of building, lighting replacement, and HVAC systems and appliances...."
- **B6.3**, Improvements to environmental control systems
- **B6.4,** Facilities for storing packaged waste for 90 days or less
- **B6.5**, Facilities for characterizing and sorting packaged waste and overpacking
- **B6.6,** Modification of facilities for storing, packaging, and repacking waste
- **B6.8,** Modifications for waste minimization and reuse of materials

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.							
Regulatory Requirem	nents in 10 CFR 1021.410(b):						
	The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. See paragraph above for specific categorical exclusion(s) applied.						
class of actions v	classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B include conditions that are integral elements of the of actions which must be satisfied in order to determine that a proposal is categorically excluded under Appendix B. ifically, a proposal must be one that would not:						
	(1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;						
	(2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;						
	(3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural products that preexist in the environment such that there would be uncontrolled or unpermitted releases;						
	(4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to:						
	(i) Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, Federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places;						
	(ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or

			mammals and Essential Conservation and Manag	Fish Habitat (Marine Mamma	eir habitat; Federally-protected m il Protection Act; Magnuson-Steve ederally-protected species (such a d Treaty Act);	vens Fishery		
				tlands (as defined in 10 CFR 1 Review Requirements: Defin	1022.4, "Compliance with Floodpitions," or its successor);	plain and		
			national parks, national r	nonuments, national natural la scenic areas (such as Nationa	lly- and state-designated wildernandmarks, wild and scenic rivers, l Scenic and Historic Trails or N	, state and		
				land, or other farmland of stated Protection Policy Act: Defin	tewide or local importance, as de aitions," or its successor;	fined at 7		
			(vi) Special sources of w water sources that are vita		fers, wellhead protection areas, a	nd other		
			(vii) Tundra, coral reefs,	or rain forests; or				
5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious or invasive species, unless the proposed activity would be contained or confined in a manner designed operated to prevent unauthorized release into the environment and conducted in accordance with apprequirements, such as the Department of Agriculture, the Environmental Protection Agency, and the National Institute of Health.								
	There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternative uses of available resources.							
The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or §1021.211 of this part concerning limitations on actions during EIS preparation.
